Brazilian
Vila Nova de Gaia - Portugal

Goal

- Frontend

Education

- **Scrimba**
 - React 2022 - 2022
- **FreeCodeCamp**
 - JavaScript Algorithms and Data Structures 2021 - 2022
- **Udemy**
 - Full Modern Web Course with JavaScript 2021 - 2022
- **Curso em Video**
 - JavaScript, HTML and CSS 2021 - 2021
- **Curso em Video**
 - Python 2020 - 2021
- **Delfin English School**
 - English as a second language 2015 - 2018
- **Universidade Paulista**
 - Bachelor degree in Sports Science 2010 - 2014

Projects

Movie App - [demo](#) / [code](#)

- This App allows the user to search for movies by name, check extended information about a movie, add movies to watchlist or watched movies and delete movies from a list.
- I used React Hooks to consume data from OMDb API as well as handle its states, localStorage to store data of the movies added or deleted from the lists and Context API to access global states on multiple components throughout the whole application.

Link Saver - [demo](#) / [code](#)

- This App saves the name, store, price and link of products.
- The information is rendered on a side bar with edit and delete buttons so the user can update its state.
- Search and price filters make it easier for the user to reduce the list of products displayed or simply organize them.
- I used localStorage to store the data and React hooks to handle its state and display it on the browser.

Calculator - [demo](#) / [code](#)

- Main functions of a calculator.
- Quick and simple equations with a nice user interface.
- Responsive and well styled buttons.

Countdown - [demo](#) / [code](#)

- Set-time button displays arrows on the browser enabling the user to choose the time and it only functions if the current time is equal to zero or the running time is paused.
- The start button hides the arrows, updates the time and switches to a pause button.
- The pause button stops the time, enables the set-time button to function again and switches back to start button.

Skills

HTML, CSS, JavaScript, React, Bootstrap, Python, JQuery, Node.js, Git, Github .

Experience

BAO'S Taiwanese Burguer - Porto, Portugal

- Waiter 2019 - 2021

Natural Bakery - Dublin, Ireland

- Barista 2016 - 2018

Koka Academia - Sao Paulo, Brazil

- Personal Trainer & Swimming coach 2010 - 2015

Hobbies

- Travelling and Experiencing new cultures.
- Exercising and keeping a healthy life-style.
- Exploring new tech and video-games.
