LINKEDIN

Skills

- HTML, CSS, JavaScript, React, Bootstrap, Node.js, JQuery, Python.

Goal

- Frontend

Projects

- Link Saver - https://michelpomerantzeff.github.io/linksaver-with-localStorage/
  - Link Saver App stores data of products the user is browsing.
  - Sidebar displays all the data stored on the server side with delete and edit options so the user can modify the information if necessary.
  - Json Server was used as a fake API to store all the data. Therefore the user is able to make POST/PUT/DELETE requests and experince a responsive application
- Calculator - https://michelpomerantzeff.github.io/calculator/
  - Main functions of a calculator.
  - Quick and simple calculations with a nice user interface.
  - Responsive and well styled buttons.
- Travel journal - https://michelpomerantzeff.github.io/traveljournal
  - This travel journal shows pictures and information such as name, location, date and a quick description of a few places I have visited.
  - The data is saved in a file and accessed through props using React, therefore all the content is displayed without having to modify the posts one by one.
  - The location link redirects the user to google maps showing the whereabouts of each place.
- Countdown - https://michelpomerantzeff.github.io/Countdown/
  - A useful timer that counts down from the time that is set through the set button to zero.
  - Once started it updates the hours, minutes and seconds until it reachs zero.
  - The start button switches to "pause" while the time is running and back to start once "pause" is clicked.

Education and Languages

- Scrimba
  - React Jan 2022 - Feb 2022
- FreeCodeCamp
  - JavaScript Algorithms and Data Structures Nov 2021 - Feb 2022
- Udemy
  - Full Modern Web Course with JavaScript Oct 2021 - Feb 2022
- Curso em Video
  - JavaScript Sep 2021 - Oct 2021
- Curso em Video
  - HTML and CSS Aug 2021- Sep 2021
- Curso em Video
